**415**

## INTERPRETATION OF OVERALL PERFORMANCE

The American Board of Internal Medicine Internal Medicine Maintenance of Certification Examination is a standardized test that ensures all examinees experience the same level of difficulty to successfully complete the exam. Overall performance is reported on a standardized scale ranging from 200 to 800 points. Your performance on the entire exam determines the exam pass-fail decision. To pass the exam, your standardized score must equal or exceed the **standardized passing score** of 366. The graph on page one shows your performance relative to both the standardized passing score and to a **reference group** of diplomates who took this exam in recent years. The links to the right provide more information related to understanding your overall performance.

## CONTENT AREA SUBSCORES AND FEEDBACK

The table below is an overview of your relative strengths and weaknesses in the medical content areas. Your standardized score in each medical content area is reported in standard deviation units above and below the reference group average (vertical dotted line). Due to the limited number of questions in each content area, content area subscores are less precise than the overall score. Narrower boxes indicate a greater level of precision in calculating your score. Because the overall score and the content area subscores are on different scales, they cannot be directly compared. The links to the right provide more information related to understanding your performance in medical content areas. Also provided on the following page is a detailed listing of exam content, showing the blueprint content description and cognitive task, that you missed in each area.

## YOUR PERFORMANCE IN MEDICAL CONTENT AREAS

## Cardiovascular Disease

BLUEPRINT DESCRIPTION	TASK
Hypertension (see also Endocrinology, Diabetes, and Metabolism, Nephrology, and Obstetrics/Gynecology sections)	Treatment/Care Decisions
Pericardial disease	Diagnosis
Ischemic heart disease	Testing
Dysrhythmias/conduction defects	Treatment/Care Decisions
Valvular heart disease	Diagnosis
Myocardial disease [2 questions]	Diagnosis
Cardiac tumors	Diagnosis
Vascular disease	Testing
Vascular disease	Treatment/Care Decisions
Miscellaneous cardiovascular disease	Risk Assessment/Prognosis/ Epidemiology

## Endocrinology, Diabetes, and Metabolism

BLUEPRINT DESCRIPTION	TASK
Thyroid disorders	Treatment/Care Decisions
Testes/Male reproductive health	Treatment/Care Decisions
Diabetes mellitus	Treatment/Care Decisions
Disorders of calcium metabolism and bone	Treatment/Care Decisions
Disorders of calcium metabolism and bone	Testing

## RESCORE INFORMATION

---

ABIM's scoring process is a meticulous one and includes a rigorous set of quality control steps to verify the accuracy of results for every examinee. We have taken all the appropriate steps to verify the accuracy of your results. It is very unlikely that an error occurred in retrieving your answers from the computer or scoring your exam. However, you may request a rescore for a fee of \$250.00. Bear in mind that given the quality controls in the scoring process, a rescore is unlikely to change the outcome of your exam results. [See additional information on how exams are scored including the rescoring process.](#)
